

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investec
Cautious Managed Fund

A sub-fund of Investec Funds Series i
Managed by Investec Fund Managers Limited

Class I Accumulation shares in sterling
ISIN: GB00B2Q1J816

Objectives and investment policy

The Fund aims to provide income and long-term capital growth.

The Fund seeks to invest conservatively around the world in a diverse range of shares of companies (up to 60% of the Fund's value at any time) and bonds (contracts to repay borrowed money which typically pay interest at fixed times).

The Fund may invest in other assets such as cash, other funds and derivatives (financial contracts whose value is linked to the price of an underlying asset).

The Investment Manager is free to choose how the Fund is invested and does not manage it with reference to an index.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can buy or sell shares in the Fund on any business day in the UK, as defined in the Investec Funds Series omnibus prospectus (section 3).

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the risk and reward indicator scale. This is because, although it invests in the shares of companies whose values typically tend to fluctuate widely, it also invests significantly in bonds which do not typically fluctuate as much.

Risks that may not be fully captured by the Risk and Reward Indicator:

- Currency exchange:** Changes in the relative values of different currencies may adversely affect the value of investments and any related income.
 - Default:** There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.
 - Derivatives:** The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss.
 - Equity investment:** The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.
 - Government securities exposure:** The portfolio may invest more than 35% of its assets in government securities issued or guaranteed by a permitted single state.
 - Interest rate:** The value of fixed income investments (e.g. bonds) tends to decrease when interest rates and/or inflation rises.
- The full list of the Fund's risks are contained in the appendices of the Investec Funds Series omnibus prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Fund's annual report for each financial year will include detail on the exact charges made. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Investec Funds Series omnibus prospectus.

Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in sterling.

The Fund was launched on 7 June 1993 and this share class on 3 March 2008.

(1): Performance has been simulated for this period based on a longer established share class

Practical information
