Legal & General S&P 500 US Equal Weight Index Fund Unit Class I GBP Accumulation - ISIN: GB00BSWT8L75

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the S&P 500 Equal Weight Index (the "Benchmark Index") on a net total return basis before fees and expenses are applied. Therefore, the Fund's performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
 - The Benchmark Index is comprised of the constituents of the S&P 500 Index ("Parent Index"). The Parent Index is designed to measure the performance of the largest publicly traded corporations in the U.S. The constituents of the Parent Index are weighted according to their total market value.
 - The Benchmark Index equally weights the constituents of the Parent Index at each index rebalance. This means at each index rebalance all constituents in the Benchmark Index will be allocated the same weight. Between index rebalances, constituent weightings may fluctuate due to changes in price performance of the shares of companies.
 - The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index by holding all, or substantially all, of the assets comprising the Benchmark Index in similar proportions to their weights in the Benchmark Index.
 - The Fund will invest at least 90% in assets (directly or through depositary receipts) that make up the Benchmark Index. The Fund will generally hold assets directly but can use depositary receipts (such as American depositary receipts and global depositary receipts) to gain exposure such as when the direct asset cannot be held or is not available.
 - The Fund may also invest in shares (directly or indirectly) in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index, collective investment schemes, including those managed or operated by the Manager or an associate of the Manager, money market instruments (such as treasury bills), depositary receipts (such as American depositary receipts and global depositary receipts), cash and permitted deposits.
 - The Fund may use derivatives (financial contracts which have a value linked to the price of another financial asset (such as a share, bond or currency) or a market index) in order to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk (known as "efficient portfolio management").
- Other information:**
- The Fund is passively managed as it tracks the Benchmark Index.
 - Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3pm. This is the time we calculate unit prices for this Fund. If you contact us after 3pm, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in GBP.
 - This Fund may be suitable for any eligible investors who want to invest for at least five years and are looking for a fund that aims to track the S&P 500 Equal Weight Index, with the Benchmark Index providing exposure to shares of US large-capitalisation companies where the shares of these companies are equally weighted upon each index rebalance.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- Even a fund in the lowest category is not a risk free investment.

- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports. The risk and reward indicator may not take account of the following risks of investing in the Fund:
 - The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
 - We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.03% for purchases and 0.03% for sales at launch. Please note this figure is an estimate as the fund is new. The amount of the dilution adjustment may differ in future.
